## DETAILED ACTION

### *Drawings*

1. The drawings are objected to because they have handwritten annotations. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: (1), (2), (3). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid

abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 & 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Powell (US Patent 5,248,385).

Claim 1: Powell teaches a silicon carbide epitaxial wafer which is formed on a substrate that is less than 1° off from the {0001} surface of silicon carbide having an a-type crystal structure (Col. 4 lines 40-67 – Col. 5 lines 1-20; Claim 1).

Claim 2: Powell teaches the silicon carbide epitaxial wafer is formed on a {0001} C face of the substrate (Col. 5 lines 1-20).

Claim 6 : Powell teaches a manufacturing method of a silicon carbide epitaxial wafer, wherein silicon carbide is epitaxially grown on a substrate that is less than 1° off

Art Unit: 2814

from the {0001} surface of silicon carbide having an a-type crystal structure (Col. 4 lines 40-67 – Col. 5 lines 1-20; Claim 1).

Claim 7: Powell teaches the silicon carbide is epitaxially grown on a {0001} C face of the substrate (Col. 5 lines 1-20).
